\*Above Pricing excludes GST

\*Pricing Excludes Installation, System Programming & Cabling Works

\*\* Optional Card is Required for PABX Box Integration with Door Phones and Bells

POS Workstation  
JS-925WS

## Perfectly Sized For Your Business

### Ecology

JS-925WS uses an Intel Atom CPU which reduces electric power consumption and improves performance while achieving a 10% power-savings against previous models. Environmental considerations also extend to the component level.

### Small Footprint

The compact, all-in-one design of the JS-925WS eliminates clutter and requires less counter space.

### User-Friendly Design

Adjustable display provides a wide range of viewing angles to accommodate the height of virtually any user as well as accommodate for environmental glare.

### Functionality

JS-925WS provides various options to meet customer's needs. (15"/12" Display, Magnetic Stripe Reader, Fingerprint Reader, Dallas Key Reader, RAID HDD, Solid State Disk, UPS Battery, Asset Management (software))

### Quality and Reliability

- Fanless:** Dust and debris are not circulated through the interior of the workstation, adding to overall reliability. And, with fewer moving parts the JS-925WS has a lower failure rate than fan-based units.
- Spill proof:** Purpose-built and tested for harsh environments.
- RAID HDD:** Optional second HDD with RAID 0,1 support provides data protection and backup.
- SSD:** Optional Solid State Disk prevents mechanical shock, creates power-savings and reduces the risk of HDD trouble.
- UPS Battery:** Optional internal uninterrupted power supply ensures smooth system shutdown and recovery in the event of sudden power loss.
